

I listen to KLOVE on 91.1 FM. I really enjoy this station and hope that you do not plan to remove, replace or force the FM translators off the air. KLOVE is the only station I listen to and my kids love it also. I think that the local community will be effected by this station's removal by the fact that so many of my friends listen to it and find it soothing. There is no graphic language, no talk about sex or stupid pranks, no music that I wouldn't want my children listening to, actually, there is nothing bad about this station at all. People benefit from listening to it because it plays wholesome, encouraging, uplifting music. The hosts are funny and not offensive, it is very entertaining and a bright spot in the radio world.
